the working title of the book was the detection of analytes by the resin spot tests method firstly we decided to sort out all published qualitative methods systematically against analytes we were not discouraged by the obstacles such as the study of a great number of papers published in japanese the difficulty in locating especially older

publications or the time required still having in mind not to burden unnecessarily the volume of the book we dismissed the idea of systematically listing all the procedures in detail nevertheless a relatively large number of them found a place in the book and perhaps this will contribute to the stirring of spontaneous interest in this technique in the ranks of applied chemists and others who a priori shun the technique

the purpose of this book is to present in a monographic and systematised form a review of all the literature devoted to polyurethane based polymeric sorbents in separation chemistry the primary types of sorbents dealt with are polyurethane foams and open pore polyurethanes the structure of the monograph follows this dichotomy a book of this nature should stimulate thinking and incite its reader to consult the original literature it will however not make such a consultation superfluous a fair amount of the results described in this monograph constitute the main activity of investigation which took place in the authors laboratories during the past decade

from the avant garde design of the islamic cultural center in new york city to the simplicity of the dar al islam mosque in abiquiu new mexico the american mosque takes many forms of visual and architectural expression the absence of a single authoritative model and the plurality of design nuances reflect the heterogeneity of the american muslim community itself which embodies a whole spectrum of ethnic origins traditions and religious practices in this book akel ismail kahera explores the history and theory of muslim religious aesthetics in the united states since 1950 using a notion of deconstruction based on the concepts of jamal beauty subject and object found in the writings of ibn arabi d 1240 he interprets the forms and meanings of several american mosques from across the country his analysis contributes to three debates within the formulation of a muslim aesthetics in north america first over the meaning purpose and function of visual religious expression second over the spatial and visual affinities between american and non american mosques including the prophet s mosque at madinah arabia and third over the relevance of culture place and identity to the making of contemporary religious expression in north america

due to rapid urbanization and development water get polluted by the noxious waste released from industrial sewage and agricultural runoffs sustainable materials for sensing and remediation of noxious pollutants covers two most widely used aspects in the field of wastewater i e sensing and rapid remediation with a possible solution of successful technology commercialization chapters include information on low cost materials as sensing and remediating agents for the rapid removal of noxious impurities from wastewater it includes chapters on the sensing of noxious metals low cost adsorbents for the removal of noxious impurities i e inorganic metal ions and organic dyes additional chapters include future upcoming scopes of work and one chapter on the general introduction of the field the book content will be technical and focused for the audience like graduate students academicians researchers and industrial professionals sustainable materials for sensing and remediation of noxious pollutants is single reference source for environmental scientists and engineers

interested in low cost sensing and remediation strategies assists readers in developing new strategies to address the issues related to sensing and remediation activities includes low cost materials for sensor and adsorbent development allowing professionals to make decisions based on economic considerations provides alternatives for the development of socioeconomically sustainable products for sensing and remediation application
