economics professor henry spearman investigates the murder of two of the members of the harvard promotion and tenure committee

international finance and open economy macroeconomics provides a complete theoretical historical and policy focused account of the international financial system that covers all of the standard topics such as foreign exchange markets balance of payments accounting macroeconomic policy in an open economy exchange rate crises multinational enterprises and international financial markets the book uses the 1944 bretton woods conference as a unifying theme to relate the many controversial issue it is written in a lively manner to bring real world events into the discussion of all of the concepts topics and policy issues there is also emphasis on the history of economic thought in order to explain how economists in different time periods dealt with international financial issues

an innovative introduction to economic behavior that uses interactive experiments to promote experience based discovery this book presents a unique active learning approach to economic thinking providing a behavioral perspective on basic economic concepts ranging from trust to trade each chapter features a classroom experiment where students engage directly with the material as market participants and chapters come with warm up exercises quizzes and

incisive summaries the economic experience empowers students to develop insights into essential economic principles and goes beyond merely documenting behavioral anomalies by showing students how to navigate and anticipate them through hands on learning and team building encourages discovery of key behavioral insights with interactive class simulations provides a socratic structure through lab reports for interpreting and applying lessons from experiment results while interacting with fellow students includes what economists do sections that highlight key applications and policy issues covers standard topics such as gains from trade marginal analysis and the resilience of competitive markets enables students to experience the negative effects of market imperfections related to monopoly power non price rent seeking corruption congestion and inadequate incentives for the provision of public goods introduces notions of risk and strategic behavior in games and auctions explains foundational macroeconomic concepts such as financial markets and the role of money while addressing behavioral issues like bank runs and asset market price bubbles that may arise in a macroeconomic setting is supported by a free website that instructors can use to set up classroom experiments online

eureka skousen has done the impossible students love it i will never use another textbook again harry veryser university of detroit mercy they said it couldn t be done austrian economics is so different they said that it couldn t be integrated into standard neo classical textbooks consequently college students learn nothing about the great austrian economists mises hayek schumpeter professor mark skousen s economic logic aims to change that based on his popular course taught at columbia university skousen starts his micro section with carl menger s theory of the good and the profit and loss income statement to explain the dynamics of the market process entrepreneurship and the advantages of saving then he uses a powerful hayekian four stage model of the economy to introduce macro including a new austrian measure of spending at all stages of production gross domestic expenditures economic logic also offers chapters on the international gold standard the defects of central banking and the mises hayek theory of the business cycle a full critique of the keynesian aggregate supply and demand as ad model and a revolutionary austrian alternative entrepreneurship the financial markets environmental economics monetary policy and inflation federal spending and taxes and government regulation leaders of all schools including austrian keynesians marxist chicago and public choice

ayn rand wrote and lectured on economic concepts and topics this volume addresses the economic and business aspects of her writings the authors of this anthology are from a variety of fields and all of them are enthusiastic supporters of her ideas

in this collection of original essays several prominent writers and critics of the genre examine the interface of theology and detection edward d hoch discusses roman catholic sleuths james yaffe discusses jews in detective fiction marvin lachman discusses the use of religious cults as mystery story backgrounds co editor breen writes of protestant religious mysteries and on mormonism in the mystery and four authors of mysteries about religious detectives william x kienzle ellis peters harry kemelman and sister carol anne o marie respond to a series of questions about their work

while the economic impacts of resource use pervade discussions of coastal zone management most discourses tend to be ill defined and incomplete and to lack a solid basis in economic theory this primer was written to eliminate this confusion for those non economists who seek

insight into economic thought and into how economic analysis can contribute to coastal zone management the first half of the report introduces readers to basic concepts and analytical methods in microeconomics public finance and environmental and resource economics the foundation for monetary valuations becomes apparent as the concepts are explained the realization that neither markets nor prices are required for economic valuations is an important result of the explication consequently one can assess losses associated with pollution reduced access and so on in units that are commensurable with market oriented development the second half of the primer inculcates these basic concepts and methods through 1 critiques of several stereotypical pseudoeconomic arguments 2 a case study of the benefits of protecting water quality for recreation and 3 a benefit cost analysis of a hypothetical acquisition program that is intended to protect groundwater quality to protect opportunities for aquatic recreation and to reduce the growth in traffic

consists of abstracts of articles from brazilian economic periodicals and provides tables of contents for various other international periodicals

presents an innovative approach to economic education and literacy building on empirical research showing that economic principles are best learned when integrated into other fields the author uses seventy eight selections from classic and contemporary fiction drama poetry and prose to give flesh to more than twenty major economic concepts issues and themes

what do globalization the abortion debate and the decision one makes about what to do about dinner have in common this and other questions that arise from the necessity of individuals and groups to deal with the who what where when and how of production distribution and consumption are addressed in this provocative and witty publication street wise and jaded undergraduates will end up taking a fresh look at their everyday lives and the larger world they will someday manage casting aside the idea that economic deals only with things that can be measured with money smith encourages people to think not just about dollars but also about sense the emphasis is on the sociocultural costs and benefits involved in making choices readers are challenged to rethink many of the usual ways of understanding such everyday concepts as property capital poverty and affluence distribution and exchange power and authority rights and privileges versus duties and responsibilities and even such issues as surplus and waste thoughtful people everywhere are asking whether future generations will bask in the sun of such technological innovations as the internet cloning and genetic modification and medical breakthroughs or live in the shadows cast by these same changes one of the most important themes addressed is a range of ethical questions not the least of which is how when and to whom future costs and benefits will be distributed amazon ca prod desc
